How to use the formulary

Note:

This formulary lists medicinal products that are available within the National Health Scheme for Out-Patients use.

- Medicinal products listed can be issued via a Schedule V Card (Yellow Card) once Schedule V entitlement is in place or to Pink Card holders if the respective item is Pink Card Positive.
- Certain medicinal products are protocol regulated and will be supplied only against the relevant approval in addition to the Schedule V Card.
- **After hours,** the Resident Specialist on duty can endorse approval of protocol-regulated drugs, provided that it is then endorsed by its respective consultant on the next day.

Prescriber Criteria:

All Medical Practitioners, i.e. doctors working within the National Health Services and private doctors, can change the dose of treatment for the following conditions when an item is marked on the formulary as 'Medical Practitioners' or 'Consultant'. This includes also protocol-regulated items. (Medicines that require permit/approval)

1. Hypertension
2. Diabetes Mellitus
3. Chronic Heart Failure
4. Asthma
5. Chronic Obstructive Pulmonary Disease
6. Treatment for hypercholesterolaemia under the respective Schedule V conditions
7. Chronic Mood Disorders
8. Chronic Neurotic Disorders

Dispensing

When dispensing a **formulary item**, patient should present:

- Valid Schedule V card
- Prescription (white prescription [DH 46] and/or green prescription [DH 129] + Control card [DH680i])
- Patient's ID card and ID card of person who comes to collect the medicines on the patient's behalf

When dispensing a **protocol regulated item**, patient should present:

- Approval form
- Valid Schedule V card
- Prescription (white form [DH 46] and/or green form [DH 129] + Control card [DH680i])
- Patient's ID card and ID card of person who comes to collect the medicines on the patient's behalf

If an item is added to the Schedule V card in ink and endorsed by the Consultant, the patient should be directed to the Medicines Approval Section (POYC), St Luke's Hospital to have the necessary amendments made to their entitlement documents and POYC records. The necessary medicinal supplies will be sent to the respective community pharmacy at the earliest possible. This does not apply to particularly vulnerable patient groups and conditions requiring urgent treatment e. g. Malignancy.
If a Schedule V card is valid and there is no more space to log in dispensing entries, patients should not be sent to the Medicines Approval Section (POYC) [Formerly known as the Schedule V office] for a Continuation Sheet/Card. Instead, a Continuation Sheet/Card is attached to the Schedule V card, by the dispenser. The Continuation Sheet/Card is only valid if attached to the valid issued Schedule V card. Dispensers are to make sure that they have Continuation Sheets readily available.

If the Schedule V card is **expired**, the dispenser should dispense the items **once** and instruct the patient to fix an appointment with the Consultant for the renewal. The endorsed Schedule V request can then be left at Mater Dei Hospital Pharmacy or sent to the Medicines Approval Section (POYC).

If a Schedule V Card Application with the relevant prescriptions is presented, the dispenser should dispense the items **once** and instruct the patient to leave the application at Mater Dei Hospital Pharmacy or send it to the Medicines Approval Section (POYC).

Protocol Regulated Drugs

The requests for these drugs should be sent to the Medicines Approval Section (POYC) to be reviewed accordingly. The approval is given according to the individual protocols and approved for a stated duration (in months or years) depending on the specific item.
If the approval is **expired**, the dispenser should dispense the item **once** and instruct the patient to fix an appointment with the Consultant for the renewal requests endorsement. The endorsed request should be left at

Mater Dei Hospital Pharmacy or sent to the Medicines Approval Section (POYC).
If a request for a protocol regulated drug with the relevant prescription is presented, the dispenser may dispense items for one month **only** if the item is **according to protocol.**

Schedule V Cards with Codes Instead of Patient's Name

Certain Schedule V cards are issued with a code instead of the patient's name. The treatment covered by these Schedule V cards should be dispensed from hospitals only.

Pink Positive Drugs (Drugs available for Schedule II holders)

Pink card positive drugs were classified into acute (A), chronic (C) and both acute and chronic use (B).
(A) – Items for Acute Use

Medicines are classified as (A) for conditions where treatment should have a rapid onset and is of short duration.
(C) – Items for Chronic Use

Medicines are classified as being for chronic use if they are utilized for the treatment of an ongoing or recurring condition.
(B) – Items for Both Acute and Chronic use

Medicines which can be used both for short a duration of use and for an ongoing or recurrent condition.

Genitourinary (GU) Clinic Entitlement

A legal notice (LN 188/2009) was issued containing a list of medicines that can be dispensed by the consultant from the GU Clinic.
The legal notice entitled 'Provision of Medicinal Products through the Genitourinary Clinic within the Government Health Services Rules' states that:
The medicinal products listed in the Schedule shall only be provided by the consultant to patients attending or who have been referred to the clinic.
The consultant shall:

a. Provide the medicinal products referred to in the Schedule, directly to patients attending the clinic, and he shall keep a record thereof;
b. Dispense only those amounts which are needed for the period specified therein;
c. Immediately notify the Authority of any amendment needed in the Schedule;
d. Inform the Authority of the address of the clinic and of any changes in such an address;
e. Be responsible for all duties and obligations relating to the provision of medicinal products to patients under the Act and any regulations or rules made thereunder, and for standards and conditions issued by the Authority from time to time in relation to dispensing;
f. Keep such amount of medicinal products as per internal arrangements with the hospital pharmacy in order to ensure continuation of service at the clinic;
g. Take all reasonable precautions to ensure appropriate storage and dispensing of medicinal products;
h. Keep updated, written, and agreed procedures with the hospital pharmacy supplying the medicinal products.

List of medicinal products authorized for the purpose of these rules

1. Doxycycline 100mg bd for 7 days. (Occasionally for 14 days in epididymitis and rarely for 28 days in LGV and Latent Syphilis)
2. Erythromycin 250mg - two tablets daily for 7 days
3. Metronidazole 200mg tablets - 2 tablets daily for 7 days
4. Ceftriaxone 500mg IM injections and 1% lignocaine injection for dilution to be given as stat dose
5. Spectinomycin 2g IM stat
6. Benzathine Penicillin 1.2 million units IM injections and 1% lignocaine injection for dilution to be given as stat dose of 2.4 million units.
7. Clotrimazole 100mg pessaries
8. Podophyllotoxin 0.15% cream
9. Podophyllotoxin 0.5% topical solution
10. Aciclovir 200mg to be given as 400mg tds for 7 days for acute episodes
11. Prednisolone 5mg to be given as 20mg tds for 3 days
12. Amoxicillin 250mg to be given as 500mg tds for 5 days
13. Azithromycin 250mg and 500mg

When dispensing one of the above mentioned drugs, a patient needs only to present a prescription from GU consultant; there is no need of a Schedule II card (Pink Card) or a Schedule V card. This applies for the 13 drugs mentioned in the Legal Notice **only.**

Specialists in Family Medicine Working within the Public Service or Private Sector

Specialists in Family Medicine working within the Public Service or private sector, can apply for or renew Schedule V entitlement documents in line with the entitlement requirements of the Outpatients Formulary and the respective protocols.

Patients with co-morbid conditions necessitating other treatment should still be referred to the relevant specialist medical professionals as per usual.

Antibiotics for Treatment of Diabetes Related Infections

The following antibiotics can be prescribed for Diabetes Mellitus Type 1 or Type 2 by doctors in the community. Prescriptions cannot exceed ten (10) days duration and the number of episodes should not exceed three per calendar year. If longer courses are believed to be required, advice from respective caring physician should be sought. The antibiotics include:

a. Amoxicillin Capsules 250mg, Syrup 125mg/5mL
b. Amoxicillin + Clavulanic Acid Tablets 500mg + 125mg
c. Cefalaxin Capsules 250mg, Syrup 125mg/5mL
d. Doxycycline Capsules 100mg
e. Erythromycin Capsules/Tablets 250mg, Syrup 125mg/5mL
f. Flucloxacillin Capsules 250mg, Syrup 125mg/5mL
