Budesonide 0.02mg/mL Enema

Part A

Prescriber Criteria: Consultant Gastroenterologist
Consultant Surgeon

Outpatient and Inpatient use:

1. Inflammatory bowel disease

To be used in patients:

- who do not respond to standard steroid preparations and where the only alternative would be surgery, or
- who suffer from severe steroid side-effects (e.g. osteoporosis, cushingoid patients, particularly young female patients).

Duration of Approval: 8 weeks

Note:
Budesonide retention enema is approved for a **maximum** duration of **8 weeks**; hence requests for renewal of permit will **not** be accepted.

Part B

Prescriber Criteria: Consultant Gastroenterologist
Consultant Paediatrician
Consultant Surgeon

Outpatient and Inpatient use:

1. Inflammatory Bowel Disease

To be used in paediatric patients:

- who do not respond to standard steroid preparations and where the only alternative would be surgery, or
- who suffer from severe steroid side-effects (e.g. osteoporosis, cushingoid patients, particularly young female patients).

Duration of Approval: 1 year

Part C

Prescriber Criteria: Consultant Oncologist
Consultant Palliative Care

Outpatient and Inpatient use:

1. Malignant Disease

Duration of Approval: 1 year
